

Everyone needs a **rational** kitchen

There's nothing like a European kitchen. Clean contemporary lines, fully integrated appliances, clever pull-out systems, uber-functionality. Rational Kitchens & Accessories lets you create the unmistakable look of a bonafide European kitchen in your own home.

Opened three years ago, the showroom is managed by Peter Cook. He's a native of Holland and a kitchen specialist with more than 20 years experience in the industry. "In Europe, a kitchen specialist is someone who helps you plan the whole kitchen – not just the style of cabinets you want, but the appliances, fixtures, lighting, functionality – everything."

Planning a kitchen is also about understanding who's using the kitchen, who's doing the cooking and what kind of cooking you do. Attention to detail, whether it is rounded corners, hygienic quartz countertops, optimal counter

heights or overflow on kitchen sinks, can make your kitchen safer, more convenient and more liveable. And for Cook, liveability is a fundamental part of kitchen design.

The functionality and flexibility of a Rational kitchen are second to none. The German company is one of Europe's top kitchen manufacturers, and the brand is known for contemporary designs, innovative systems and environmentally sustainable manufacturing processes. The company ethic is to build kitchens for life, which is reflected in the quality materials and construction.

As the sole distributor for Rational kitchens in Western Canada, the Calgary showroom has become a gateway for those with a taste for contemporary European design. "We're the real deal. We offer 100% European kitchens, a European guy who knows the product, and the kind of functionality and flex-

ibility that suit today's lifestyle focus, and we do it at a competitive price."

Cook's all-encompassing philosophy means you will also find a selection of Euro-inspired sinks, faucets, hardware, under-counter and over-cabinet lighting, and even closet systems. He also carries the sumptuous Legnoart line of cooking and kitchen accessories from Italy, and the Wesco line of accessories from Germany. Visit the Calgary showroom or go online to discover why everyone needs a Rational kitchen. ■
